Press-On Tire Program

With our Press-On Tire Program, we will pick up your damaged or used assemblies, and bring them back to our shop. We'll press the bad tire off the hub, and press a new one back on.

Then, we'll deliver it back to you!

If you don't have spares, we will supply you with new hubs.

The Press-On Tire Program is designed to save you the time, money, and hassle of replacing your tires. Let us do the hard work for you!

Consignments

Hettinger offers you the option to have a consignment. **A consignment allows us to supply you with an inventory of products to keep at your warehouse or facility.** This allows you to save on shipping time, and always have the parts on hand that you need.

When you reach out, let us know what parts you are looking to keep on hand. **There is no cost other than the storage cabinet to set up.** Once arranged, you will provide us with a weekly usage report, so we can manage your inventory and resupply you when needed.

Hettinger will only bill you for the supplies you use. Once you're low on supplies, we'll send you more! This service is great when you go through inventory fast - it's an excellent way to save time and money!
